

THE FROGYMISE

XXX

Its name is the Frogymise

It has a large and blue body, green and purple tentacles. It has a long green tail, black fins and a brown pouch.

It is an enormous monster.

It is extremely dangerous and very aggressive because it protects its habitat.

It lives in the swamps of the Amazon rainforest.

Its is frugivorous, because in the Amazon rainforest there is a lot of fruit.

It often eats apples, bananas , pineapples , and dragon fruit occasionally.

It is dreadful because it can paralyse its prey with venom and change color to hide in swamps.

The Frogymise is more beautiful than the Demiguise.

It is less intelligent than the Niffler
