

The Grimson

Its name is the Grimson.

It has three fins and enormous talons to catch its prey.

This animal is very big.

It has blue feathers on its head and two big green wings.

It lives in the Pacific Ocean.

It is carnivorous because it eats meat.

It can fly high in the sky because it has two powerful wings and it can become invisible.

The Grimson is heavier than the Nundu but it is less beautiful than the Thunderbird.

Warning! It is extremely dangerous because it has a deadly venom in its pouch.
