

## The Munder XXX

Its name is the Munder. It has tentacles on the sides of its hooves and sharp fangs in its mouth.

It has a big nose and red feathers on its head.

Its eyes are multicoloured. The Munder is small. It lives in mountains on the American continent. It is carnivorous.

It eats meat because it likes blood. Its fangs contain venom and it can inject venom into its prey and paralyse them. It can see at night. The Munder is less aggressive than the Thunderbird and it is less dangerous than dark wizards. It is highly strong because it is very aggressive.
