

The Izzie

Its name is the Izzie. It has big sharp fangs and long tentacles, its snout is purple and its tail is pink. It is very tall. It lives in the Amazon rainforests in South America. The Izzie does not move away too much from its environment. It is carnivorous because it eats crocodile flesh. Its great ability is to cure illnesses but it can also teleport in all situations.

The Izzie is taller than the abromantula.

The Izzie is more beautiful than the furlap.

It is easy to tame because it is obedient, but that doesn't mean it cannot get angry.
