

THE DUNEHOOF ✕

Its name is the Dunehoof.

It has large hooves, a shell on its back, a painted horn and a long tail. It is really big and does not have any definite skin colour because it can change its skin color like a chameleon.

It lives in the desert, in Africa.

It likes eating fish because it is piscivorous.

The Dunehoof can become invisible which is practical during attacks. The Dunehoof is faster than the cheetah, and it is less dangerous than the Muntlap because it is more peaceful.
