

THE GORGON

Its name is the Gorgon.

It is very big. It has two big pink horns on its head, a red mane and an enormous jaw.

It has red spikes on its back.

It lives in the mountains, in Norway.

It is carnivorous because it eats a lot of meat.

It can paralyse its prey and it can see in the dark.

It is less aggressive than the Thunderbird and it is smarter than the Nundu.
