

THE FLESH

X X X

EATER

Its name is the Flesh Eater. It is less smart than the Nipper, and it lives further west than the Nipper.

It lives in the East Indian Ocean.

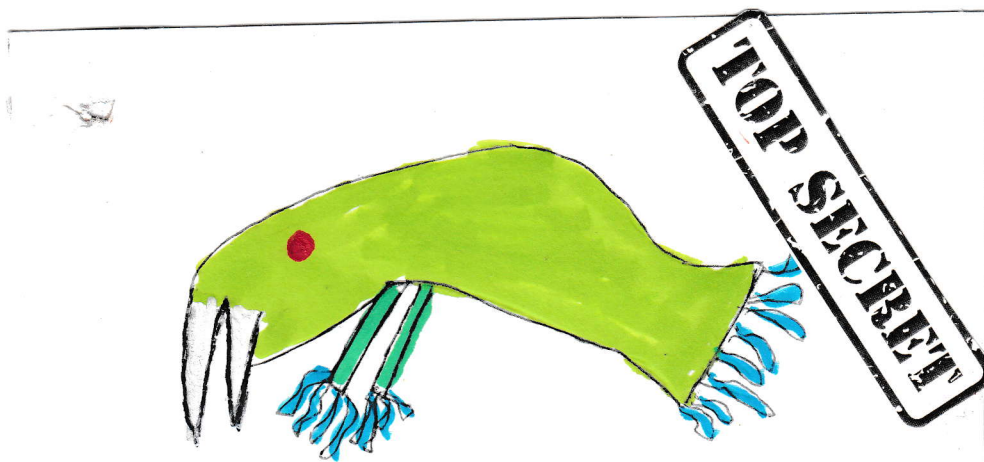

It is very dangerous because it has a venom which paralyses its prey and it swims fast.

This beast has small tentacles and big sharp white fangs.

Its eyes are big and red !!!

The Flesh Eater is carnivorous because it eats fishes and occasionally dogs.
