

THE MINDY: Dangerousness: XXX

Its name is the Mindy. It has a shell and hooves. It is big, its skin color is brown and its hooves are green. It has a long tail too. It lives in burrows in Europe. It is herbivorous, because it eats grass and leaves. It can paralyse its prey and it can see in the dark. It is heavier than the Munda and taller than the Acromentula because it is very big.

The Mindy is very protective of its eggs, which is why it is highly dangerous.
