

# The Dackey

Its name is the Dackey. It has four tentacles, sharp fangs, two wings, green and silver scales and a golden beak.

The Dackey is very tall. It lives in forests, in Indonesia. It is frugivorous because it eats fruit. It loves to eat pears and peaches and it is really greedy. It spends its day eating. It can cure diseases and tell the future. It is not very dangerous but extremely shy. It is more beautiful than the Demiguise but less aggressive than the Pundu.

10 metres tall
