

THE AGSPIDAY XXXX

Its name is the Agspiday.

The Agspiday is extremely scary and it has sharp fangs. It has long and powerful tentacles on its back.

It has thin ears and a small snout too.

It has a horn on its head. It is a bit tall and also a little big and its body has blue and purple scales.

The Agspiday lives in forests in England. It is insectivorous because it only eats insects. It can paralyze its prey with its tentacles because it is powerful. The Agspiday is more beautiful than the Demiguise and also faster than a Weasel. The Agspiday is extremely dangerous because it is very aggressive and fast.
