

The SNAKOOOP

Its name is the Snakeoop. It has sharp black and green fangs. Its tail is very long and its eyes are dangerous because they paralyze its prey. The Snakeoop is very tall and long too. It lives in swamps in South Brazil. The Snakeoop is frugivorous because it only eats fruit. It can stay under water to catch its prey and it can fly too. The Snakeoop is taller than the Acromantula and it is less aggressive than the Horcrux. It is aggressive because it has gigantic fangs and venomous tentacles.
