

The Visiblood: XXX

Its name is the Visiblood. It has a horn and a long tail. It has four wings and a long snout. The Visiblood is big. Its four wings are black and its snout is white. It lives in the Antarctic Ocean. It eats fish because it is piscivorous. It can become invisible and it can control people's minds. The Visiblood is stronger than the MuntPan, and it is nicer than the Klumde. It is extremely dangerous because its horn is very big and can hurt people.
