

MY TRAVEL GUIDE

Charlotte Chabert 1G4

**an adress we defenetly
recommend**

This was by far my favorite monument of the town. I loved the architecture and I found the place fascinating, a lot of things must have happened there.

something very old

To aswer that, we chose the church's organ even though the church itself was very old.

Organs are wind instruments that are mostly used in churches, they are very old and really majestic !

**someone tourists
should meet**

While visiting Cambridge we enjoyed some music thanks to this man.

He played guitar on the middle of the main place!

We even got to talk to him and he seemed very nice and caring .

something funny

This picture is a showcase of Harry Potter's souvenirs and Halloween costumes.

The atmosphere inside is very warm and welcoming and the decoration has autumnal undertones.

something related to university life

This is Cambridge's library, it's a huge place and has every book you could imagine. Inside everything is calm and people seem really nice.

It's a very popular library.

something historical

This building is in the middle of the main place (with the market). It's imposing and made out of brown stone. It has a beautiful clock on top of it!

something unmissable

Obviously, those famous red telephone boxes are one of the most unmissable elements of London.
