

# WE NEED TO CHANGE

## Cities are fertile ground for innovation

### ▲ LIVING UNDERWATER

How about living underwater. This could be prime real estate for future generations.

### ROOFTOP FARMING ►

Rooftop agriculture could have many benefits and help people socialize more

### ▼ Super skyscrapers

To fight overpopulation, why not live in super skyscrapers to accommodate more people.

### ◀ GREEN CITIES

To avoid fragmented green areas, why not build greener cities to save us from pollution?
