

# skycycle bike lanes and bubbles cities

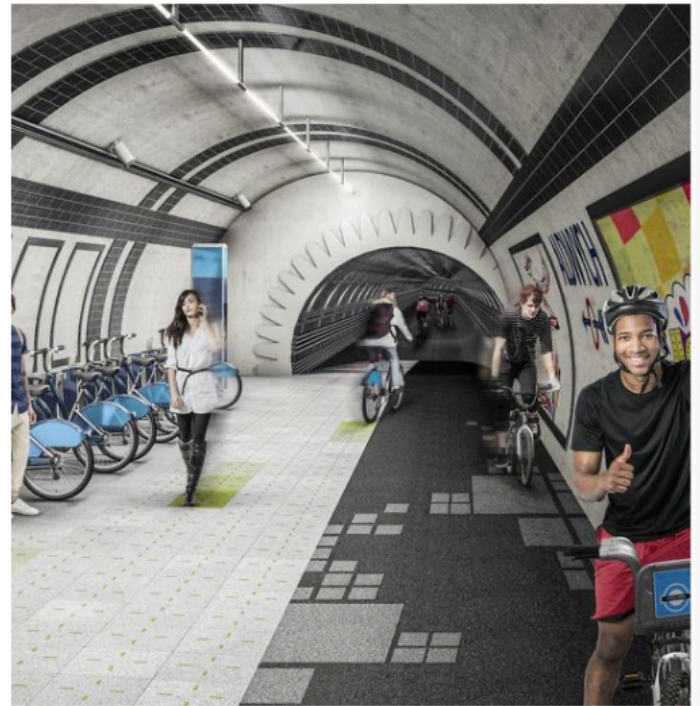

## ▲ Overground tunnels

Walking and cycling have begun dangerous because of traffic jams and the great number of cars on roads. That's why municipalities plan to build overground tunnels where riding bikes and walking around will be safer.

## ▼ Underground cycle bike lanes

Traffic jams push us to find solutions. Underground bike lanes could offer people safe rides

## ◀ Living in bubble cities

To fight against urban sprawl and overpopulation, Living under the sea would be a solution. Why not build bubbles cities ? We could see fish through the windows instead of birds and trees. Life could be a lot of fun !
