

## ▲ smart cities and supertrees

Have you already struggled in transport jams ? With smart cities, there will be no more traffic jams, no more car accidents since every single system will be interconnected and this will increase traffic speed

## ▼ Smart cities and supertrees

Connected Supertrees have the same role as trees in terms of ecology and have several functions: lighting, water distribution and conservation of plant species. They also incorporates photovoltaic panels.

## ◀ Driveless cars

Driverless cars would be a lot safer. They will reduce the number of accidents and make it safer and easier for people and things to get around
